Benefits and Specifications

Legacy II-ss9

Product Information and Specifications

- Ozone output 9.0 grams per hour @ 20.0 scfh 5.0% concentration by weight. 20.0 grams per hour @ 14.0 scfh (Oxygen)
- Computer grade universal power supply
- Self resonating ozone generation reaction chamber
- 1% to 6% wt. concentration
- Pressurized or vacuum delivery acceptable
- Remote 4-20 mA control
- Available in 0 - 30 gpm flow rates
- Manual 0-100% ozone output control
- Schd 80 plumbing
- Ozone destruct unit with j valve
- 2 hp stainless Gould recirculation booster pump

System customized to your dairy's infrastructure

- Water is treated when you need it
- Reduces system footprint due to no onsite water storage requirements
- System plugs into your existing water infrastructure minimizing onsite installation costs

Water4Dairy

OZONE WATER SYSTEMS

Optimizing your dairy's productivity

- Improve milk production & butterfat content
- Stabilize water quality to your herd
- Improve animal and overall herd health due to better hydration
- Improve performance from water related dairy equipment and infrastructure such as water lines and robots
- No ongoing chemical costs

Service Requirements (Legacy II ss-9)

		Width		Height		Depth	
		Standard	Metric	Standard	Metric	Standard	Metric
Electrical	230V / 1.4A - 120V / 2.8A						
Water	0 - 15 gpm max	20inch	50cm	23inch	57.5cm	5.5inch	13.75cm
Ozone	9 gph @ 20scfh d/a - 20 gph @14 scfh O2
